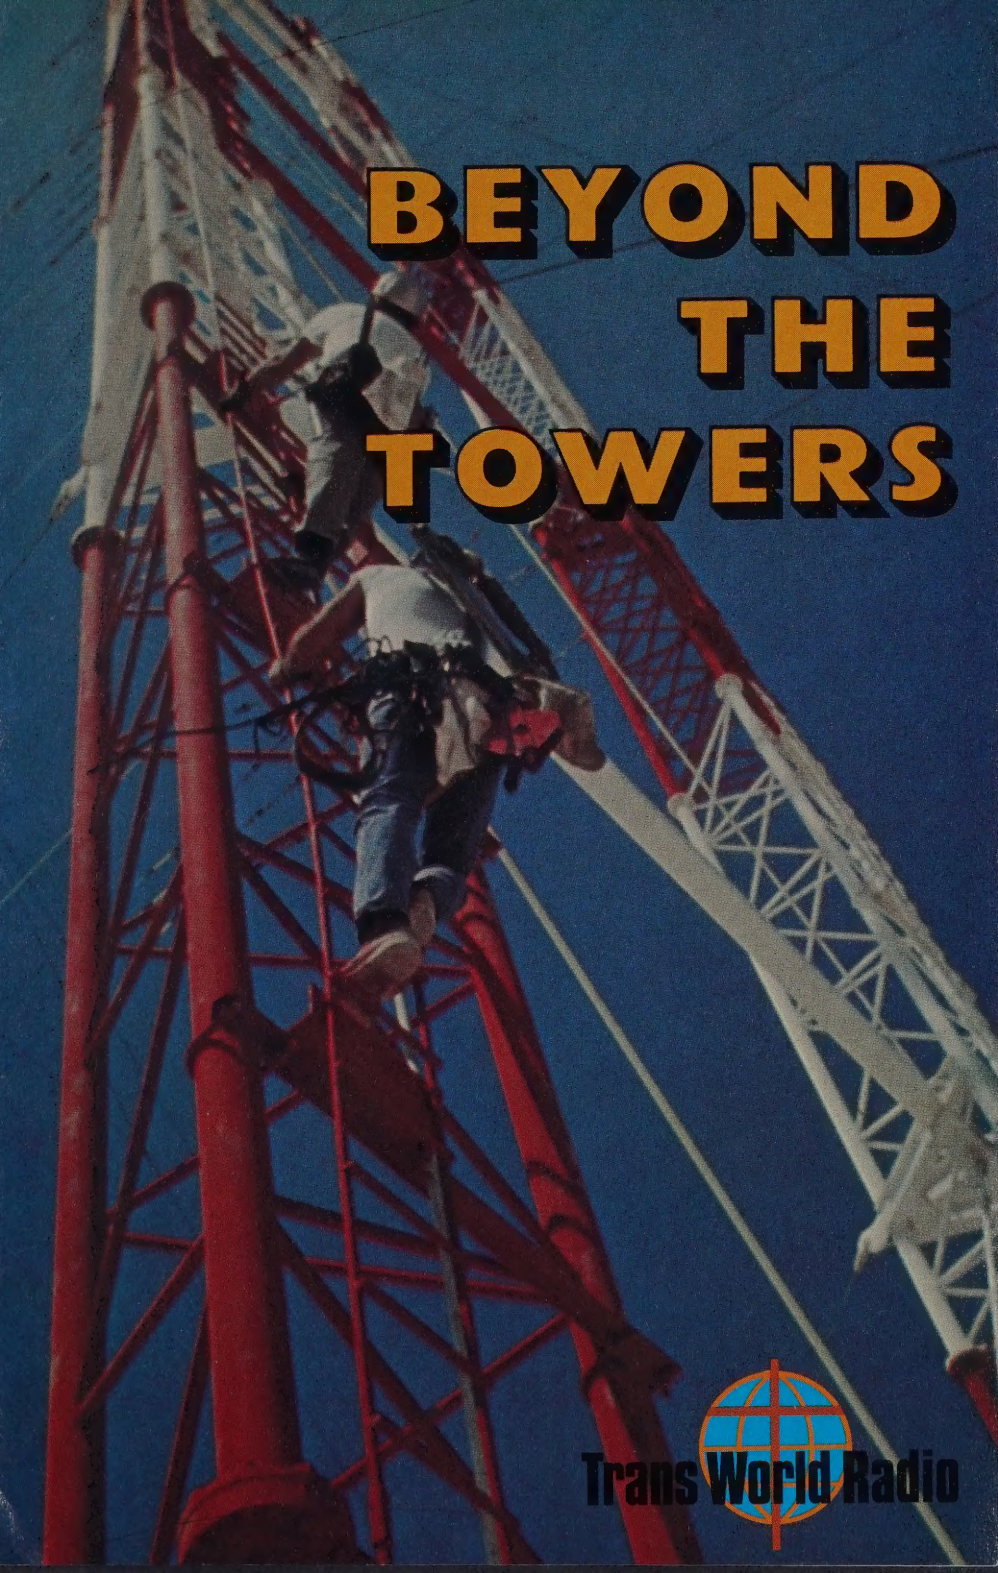
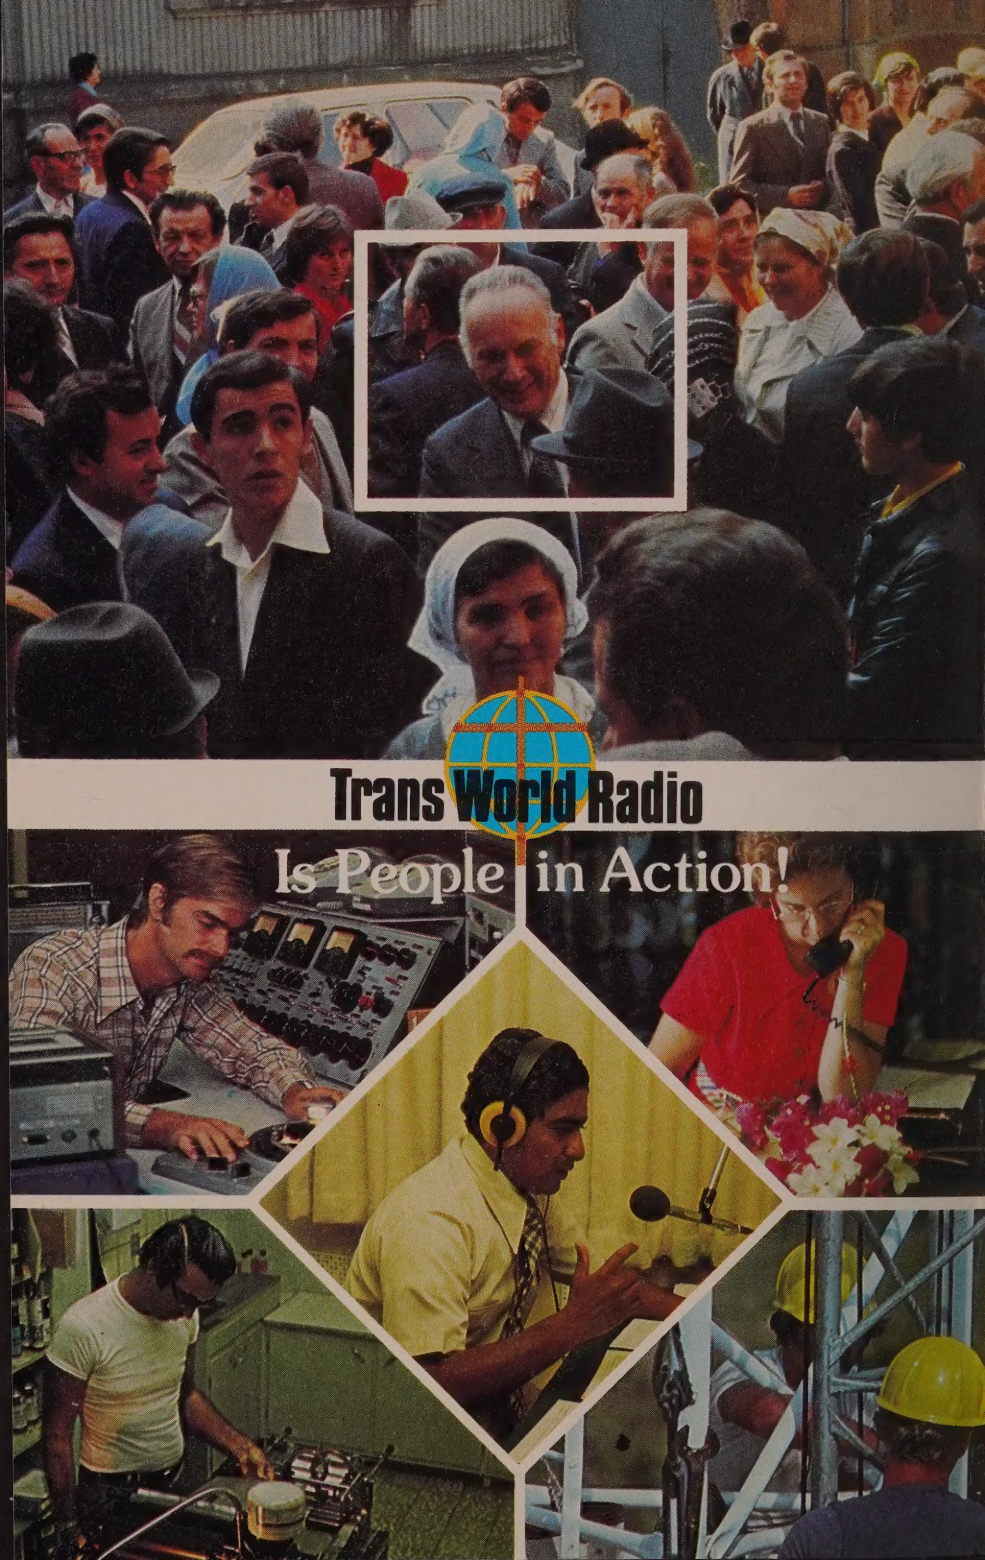
BEYOND THE TOWERS

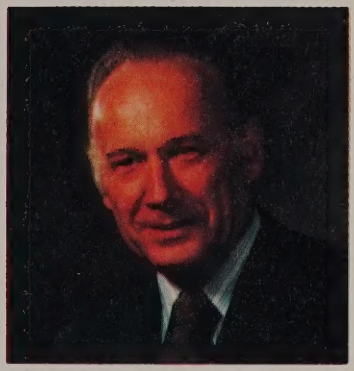


Trans World Radio



Trans World Radio
Is People in Action!

A message from Dr. Paul E. Freed, President of



Dear Friend:

Imagine . . . over 2 billion people (more than 8 times the U.S. population) without access to any Bible, church, preacher . . . or even a Christian friend.

No chance to receive a personal testimony of God's love and plan of salvation! Hopeless, and over 45 of these people per minute dying and going to a Christless eternity!

Surely you and I owe them, the hopeless 2 billion, an opportunity to be saved.

They must hear the Gospel . . . that's all . . . just hear in their own language a clear presentation of what God has done for them . . .

And believe.

"But how can they believe in whom they have never heard?"

Did you know that over 80% of those same 2 billion lost people either own or have easy access to a radio?

These 2 billion without the Gospel listen to their radios like Americans listen to television . . .

But we can't buy time on Russian, Chinese and most state-owned radio stations . . . so we are building our own SUPERPOWER radio stations to broadcast clear signals of Gospel radio to the 2 billion without an opportunity to hear.

And behind and beyond the towers is an exciting story.

How can they believe in whom they have never heard? They can't.

But . . . they can hear through SUPERPOWER radio.

Read on and learn how . . . . . .

Yours in Christ,

Paul E. Freed

PEF/blo

HOW CAN TRANS WORLD RADIO REACH THE WORLD'S UNREACHED 2 BILLION FOR CHRIST?

Our production offices in Monte Carlo. Producing programs in a variety of languages and scheduling the various programs requires an immense amount of "back up" office work.

BY BROADCASTING THE BEST IN EXISTING PROGRAMS.

Trans World Radio is more than a single missionary ministry promoting the private ideas of a small group of Christians. Trans World Radio brings together the best Christian ministries—all cooperating to "Reach the Unreached."

Such internationally known broadcasters as Theodore Epp of *Back to the Bible,* J. Vernon McGee of *Thru the Bible,* and Jack Van Impe of *Jack Van Impe Crusades* say that radio is the way to fulfill the Great Commission.

And Trans World Radio works in close cooperation with other broadcasters, local churches and mission organizations . . . in the United States and around the world to broadcast programs in over 80 languages.

Each broadcast must sound authentic and natural in its own particular language. For this reason Trans World Radio only uses nationals as speakers in the producing of programs.

A variety of program formats are used and suited to individual cultures. Supplemental tapes and recordings by local musicians are used to enrich the programs.

Dr. Freed explains the outreach of 250,000 watt transmitter on Bonaire.

When no building is available, people meet in the "open" for Bible study and fellowship. Many write, asking for more programs in their own language.

The giant diesel generators produce over 3 million watts of power. Caring for this equipment so that it operates at peak efficiency takes several missionaries' combined efforts.

The routine of regular inspections and maintenance is occasionally interrupted by a local power failure or a malfunction of an intricate internal component. Their combined engineering skills enables the missionaries to effectively operate and maintain the superpower transmitters.

BY PRODUCING MANY NEW SPECIAL PROGRAMS

While adequate Bible programs already exist in English, there are few or no good radio programs available in many languages of the world.

So a number of Trans World Radio missionaries devote their time to producing excellent quality programs in over 80 languages and dialects. Nationals, both preachers and laymen are trained to write, speak and sing the Gospel on radio.

Designed to give spiritual help, the programs are about Bible exposition, science, literature, and the English language. Personal devotional material, music and news are also included.

Many people of India perish daily through starvation. They also are starving for the Word of God. Though poor, most have access to a radio, and thousands have responded to the broadcasts.

BY CAREFULLY LOCATING OUR TRANSMITTERS

At 4:00 A.M. every morning on the small coral island of Bonaire (off the north coast of Venezuela) two diesel engines each *the size of railroad locomotives* throb into action and power a series of transmitters which saturate the air waves of Central and South America with the Gospel (just one of those AM transmitters is *10 times more powerful* than the strongest AM transmitter in the U.S. or Canada!).

And in the early evening, through the miracle of careful engineering, the powerful transmitters on Bonaire are redirected to blanket Russia and Europe with the Gospel.

One-fifth of the world's population lives in seven countries on the Indian subcontinent. The people who live in this densely populated area are often plagued by disease and hunger. For example, over four million of India's 650 million inhabitants are lepers.

There is also spiritual hunger: Hinduism and Islam dominate the region—yet many people are receptive to the Gospel. It is to these hungry hearts that Trans World Radio broadcasts from Sri Lanka so that millions can hear the Good News of Salvation . . . many for the first time.

Letters in response to these broadcasts are overwhelming. Many request someone to come and baptize new believers. These requests are channeled to national churches for follow-up.

The Chinese have traditionally had large families; one-half the population is under 30. They have grown up during the time when churches were closed, and have been taught "there is no God."

Nearly one-half the world's population lives in what is called the Far East. Broadcasts from Guam beam the Gospel to these people in Indonesia, Southeast Asia, Japan and Eastern Russia.

Can we do less than provide the teeming millions on the subcontinent of India a chance to hear God's Word?

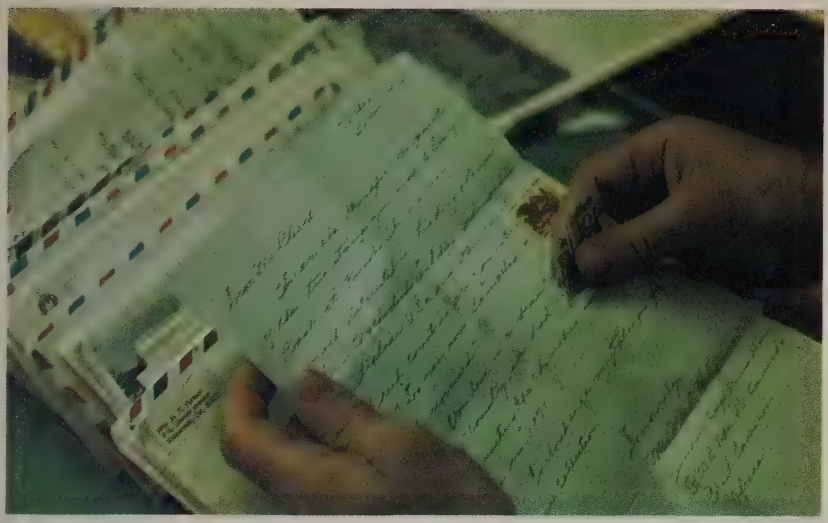
As the sun sets in the west a Chinese commune worker lays his tools down until another day, a Chinese student begins his assignment in English and a Chinese woman returns home from her tedious day in the silk factory. What do they all have in common?

A small radio to challenge the worker's thoughts about God, to teach the student English (using an English Bible for the text) and to revitalize a woman's heartfelt faith in God.

About 500 million of China's 900 million people are under 30 years of age. For the past 30 years they have grown up in a spiritual vacuum without an opportunity to hear the Gospel.

But today over 80% of the homes in China have a radio . . . and can hear Trans World Radio's programs from Guam!

The increasing flood of mail response coming from inside China graphically tells of changed lives as Christ is reintroduced to an entire nation.



The combined total of all the mail received in the offices of TWR and the respective broadcasters exceeds 500,000 pieces yearly. As a result of his broadcasts on the Sri Lanka station, one broadcaster received 200 letters per day soon after the program commenced.

BY HELPING INDIVIDUALS THROUGH LETTERS AND PERSONAL COUNSELLING

Hundreds of letters are received each day at the Trans World Radio offices around the world:

From India a villager writes, *"Our small church doesn't have a pastor, so we bought a radio to hear your Gujarathi programs. We all gather in the church to listen to you each day. Could you help us find a pastor?"*

From Brazil a letter comes: *"Every morning I listen to the teachings of the Word of God. Where I live, the nearest church is eighteen kilometers away. We must go by bus and that runs once a day. Pray that God will open a ministry in our town. Please pray for the salvation of my husband."*

And from deep inside China a man writes, *"Although we had never met before, I came to know you through the air. The waves have brought us together. From your programs I came to know the Bible. I am very interested in it and find it worthy to read. However, I do not have a copy of it. I feel that is a great pity. I only tuned in your broadcast accidentally. Since then, your programs seem to be a good companion to me. They are all very interesting."*

An ex-Hindu writes, *"I come from a staunch orthodox Hindu family, where idol worship was prominent. Jesus became my personal Savior 5 months ago. Kindly send me the new version of the New Testament in Telegu. All I cherish regarding my future is to serve God Almighty."*

When possible, spiritual counselling is handled through the mail. Literature and Bibles are sent. People are directed to local Bible-believing churches. In some cases, person-to-person follow-up is possible.

The Africans have a long history of being Christianized through the efforts of missionaries on a one-to-one basis. They are receptive to the Gospel. By means of radio, their faith can be reinforced on a daily basis.

Through radio the Gospel can reach into remote places. It can penetrate all man-made barriers. People with very limited income invariably have a radio.

During construction days, many of the missionaries wear more than one "hat" and contribute their efforts toward getting "on the air."

WHAT RIGHT HAS TRANS WORLD RADIO TO CLAIM THE WORLD'S LOST 2 BILLION FOR CHRIST?

Dedicated workers at 29 Trans World Radio installations put in long hours of hard work. Many of the missionaries sacrifice off-duty and vacation time to get the job done. They are people who love the Lord and whose lives are totally yielded to Him.

This noble group lives and breathes our urgent task of reaching the unreached. They believe, without reservations, the *Trans World Radio Statement of Faith:*

> We affirm our belief in the evangelical Christian faith as set forth herewith:
>
> The Bible which is the divinely and verbally inspired Word of God.
>
> The Triune Godhead in three persons—Father, Son and Holy Spirit.
>
> The fall and lost estate of man, whose total depravity makes necessary the New Birth.
>
> The deity of Jesus Christ, His virgin birth, death, bodily resurrection, present exaltation at God's right hand, and personal return.
>
> Salvation by grace through faith in the substitutionary death and shed blood of Jesus Christ our Lord and Savior.
>
> The resurrection of the saved unto everlasting life and joy in heaven and the resurrection of the unsaved unto everlasting punishment.
>
> The Church—the Body, or Bride of Christ, consisting only of those who are Born Again, for whom He now makes intercession in heaven and for whom He shall come again. Christ's great commission to the Church to go into all the world and preach the Gospel to every creature, baptizing and teaching those who believe.

The Board Members occasionally are able to meet on one of the TWR fields. This gives them a "first hand" experience of the excitement in broadcasting the Gospel around the world.

PAUL FREED:

Dr. Paul Freed beamed a smile at the audience and then spoke into the microphone: "It's a thrill and a privilege to be with you, my dear friends. We have a great God, don't we? He is a wonderful Savior, and I love Him."

Since he was young, Paul Freed has had a burden to reach the unreached for Christ. His parents were, for 27 years, missionaries to the Arabs on the border of Arabia and that is where he grew up. At the age of only eight, he led his ten-year-old Arab friend to the Lord, and thus started a real life of personal mission.

After elementary school in Jerusalem and Beirut, he was enrolled in a high school in the United States. But, one year later he returned to the Middle East to graduate from the American Community School in Beirut, Lebanon.

Paul Freed put himself through Wheaton College with the funds he earned from a novelty belt company he started. After graduating from Wheaton, he went on for graduate work in the missions program at Nyack College in New York. He then earned his Masters Degree from Columbia University and later his Doctor of Philosophy from New York University.

In 1948, Paul Freed attended an International Youth for Christ conference in Europe. There he heard the plea of two men from Spain for Christian workers to come to their country. Paul Freed reluctantly went to assess the opportunity. During those days, the Lord built in him a profound love for the Spanish people, and it was that love that blossomed into his life's work.

In 1952, Paul Freed founded an organization, then called International Evangelism and later renamed Trans World Radio, to broadcast the Gospel to people who had never heard it before. The first station was in Tangier, but the Lord closed that station through nationalization by the Moroccan Government. God's providence enabled the opening of an even more powerful station in Monte Carlo, Monaco.

God has given Dr. Freed the vision, drive and spiritual wisdom to know an open door when he sees one. Through careful negotiation and simple walking by faith, Trans World Radio is now broadcasting the Gospel on a total of 17 powerful transmitters at six different locations capable of reaching 80% of the world's population.

Dr. Freed and his wife Betty Jane are the parents of five children with two grandchildren. They make their home near the International Headquarters of Trans World Radio in Chatham, New Jersey.

TRANS WORLD RADIO had its origin under the name, The Voice of Tangier, broadcasting its first programs in Spanish and English in February, 1954, over a 2.5kw transmitter in Tangier, Morocco. In October, 1960, Trans World Radio increased its coverage with transmissions over a 100kw transmitter, broadcasting in 25 languages from Monte Carlo, Monaco. Presently the facilities in Monte Carlo employ the use of two 100kw shortwave transmitters, two 600kw medium-wave transmitters, which are combined for a power of 1.2 megawatts, and one 1.2 megawatt long-wave transmitter. Trans World Radio broadcasts in 34 languages from this station.

PRELIMINARY PLANS for the construction of the Trans World Radio station in the Caribbean were initiated by Dr. Paul E. Freed, President of Trans World Radio, in June, 1962. Construction of the superpower station officially got under way in September, 1963. A transmitter building was built to house the transmitting facilities, engineering offices, and a maintenance/test laboratory.

THE TRANSMITTING INSTALLATION is located five kilometers south of Kralendijk which is the capital city of Bonaire. The antennas are situated about 100 meters from the Caribbean Sea at the start of the salt flats, thus giving an ideal location from the standpoint of antenna efficiency.

FOR SHORT-WAVE TRANSMISSIONS the 19, 25, 31 & 49 meter bands are used, depending on the season of the year and the distance of the transmitting station from the target area.

TRANS WORLD RADIO had its origin under the name, The Voice of Tangier, broadcasting its first programs in Spanish and English in February, 1954, over a 2.5kw transmitter in Tangier, Morocco. In October, 1960, Trans World Radio increased its coverage with transmissions over a 100kw transmitter, broadcasting in 25 languages from Monte Carlo, Monaco. Presently the facilities in Monte Carlo employ the use of two 100kw shortwave transmitters, two 600kw medium-wave transmitters, which are combined for a power of 1.2 megawatts, and one 1.2 megawatt long-wave transmitter. Trans World Radio broadcasts in 34 languages from this station.

PRELIMINARY PLANS for the construction of the Trans World Radio station in the Caribbean were initiated by Dr. Paul E. Freed, President of Trans World Radio, in June, 1962. Construction of the superpower station officially got under way in September, 1963. A transmitter building was built to house the transmitting facilities, engineering offices, and a maintenance/test laboratory.

THE TRANSMITTING INSTALLATION is located five kilometers south of Kralendijk which is the capital city of Bonaire. The antennas are situated about 100 meters from the Caribbean Sea at the start of the salt flats, thus giving an ideal location from the standpoint of antenna efficiency.

FOR SHORT-WAVE TRANSMISSIONS the 19, 25, 31 & 49 meter bands are used, depending on the season of the year and the distance of the transmitting station from the target area.

THE TRANSMITTERS utilized were designed by Continental Electronics of Dallas, Texas, and comprise a 500kw AM, standard broadcast transmitter designed to operate on all broadcast bands, as well as a 250kw short-wave transmitter also designed for all broadcast bands. The 500kw and 250kw are equipped with vapor-phase cooling systems for the heat dissipation of the tubes.

ELECTRICAL POWER for these transmitters is generated in the Trans World Radio power plant consisting of two 16-cylinder Alco diesel engines with Westinghouse generators capable of producing a total of 3.2 megawatts of electrical power. The diesel generating units weigh 45 tons each. In addition to this, a 50kw diesel generator unit is used for auxiliary lighting, small motors, etc.

THE ANTENNA SYSTEM comprises a total of nine antenna systems. Thirty-two towers, ranging from 50 feet to 550 feet in height, make up the various antennas beamed to North, Central and South America, India, Europe and the Middle East. There are seven vertical corner reflector antenna systems and two curtain antenna systems. The medium wave directional antenna array consists of a single driven tower of 550 feet, flanked by four parasitic towers of 500 feet each. Available patterns include omnidirectional, figure eight, North American, Spanish South American and Portuguese South American. Patterns are switched by remote control from the transmitter console in a fraction of a second.

Trans World Radio

Bonaire, Netherlands Antilles

Dr. Paul E. Freed, President, founded Trans World Radio in 1952 as a non-profit, interdenominational, faith ministry dedicated to the proclamation of the Gospel of our Lord and Savior Jesus Christ.

Trans World Radio broadcasts from Bonaire, Cyprus, Guam, Monaco, Sri Lanka and Swaziland.

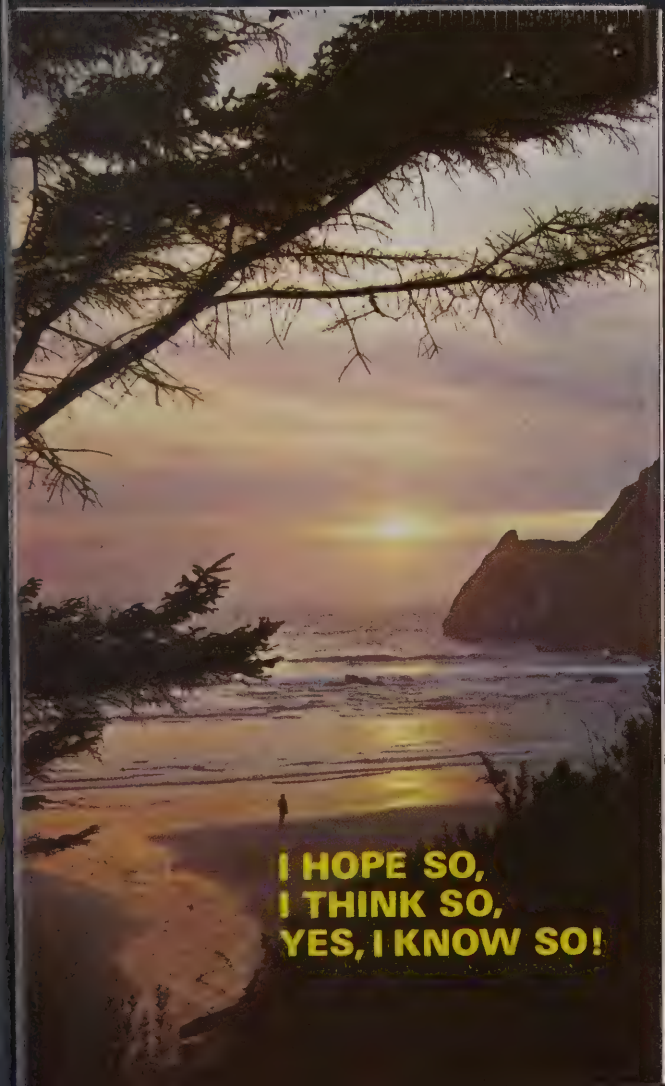
Bonaire is located at 68° 17′ West longitude and 12° 6′ North latitude.

Trans World Radio, Bonaire went on the air in August 1964, broadcasting over three powerful transmitters: 50 kW and 250 kW shortwave transmitters, as well as a 500 kW medium wave transmitter operating on 800 kHz. The transmitters and power plant are located at the south end of the island about one hundred meters from the Caribbean Sea. The 50 kW and 250 kW SW transmitters operate in the international SW bands. Electrical power is produced by two 16-cylinder Alco diesel engines with Westinghouse generators capable of producing 3.2 megawatts of power.

TWR Bonaire broadcasts the gospel message in five major languages to target areas in the Caribbean and the Americas. The 200 hours of programming weekly include 69 hours in Spanish, 56 hours in Portuguese, 62 hours in English, 7 hours in German and 5 hours in Russian.

Mail has been received from over 170 countries around the world. Many people have testified that the ministry of TWR was the direct cause, and often the only influence, that brought them to salvation in Jesus Christ. We thank God for this miracle of radio that sends the gospel message across all kinds of boundaries and reaches right to the hearts of people everywhere.

TRANS WORLD RADIO
Bonaire, Netherlands Antilles



I HOPE SO,
I THINK SO,
YES, I KNOW SO!

TRANS WORLD RADIO
Bonaire, Netherlands Antilles

As a practicing physician, with a specialty of internal medicine, I examine patients in all phases of health. Some will consult me for a routine physical examination. Others for heart, liver, kidney, stomach, or lung disease.

During the course of my practice, it is not uncommon to see a patient who has enjoyed good health all of his or her life suddenly face emergency surgery, a heart attack, the fact of cancer, or some other serious physical problem. As a result, they now begin to think of the possibility of death.

It is common to note a real sense of fear or apprehension in these patients. They have been exposed to Christianity by means of a church, or by radio or T.V., but have never taken the time to sincerely come to grips with eternal values. They will often admit they have had no need for prayer, nor have they taken the time to read the Bible. They have not sought Christian fellowship. Others will admit they attend church occasionally, do good deeds, live a good moral life, give to some religious causes or to the community fund, but do not have a true sense of "peace with God."

In talking to these patients, I have often asked the question, "Are you a Christian?" "Are you prepared to meet God?" All too often I have received the answer, "I hope so," or "I think so." However, in some cases I have received a positive answer, "Yes, I know so. I am prepared to meet God." What constitutes the difference between the "I hope so" answer and the "I know so" answer?

Just as there are many authorities who write medical textbooks, which we refer to for medical knowledge, so we have a spiritual authority, God, who has given us His Word, the Bible.

In Romans 3 verse 23 we read,

"For all have sinned and come short of the glory of God."

This means that everyone has sinned. We were all born in sin. We cannot escape this fact. Just as a patient who is found to be a diabetic cannot escape the disease and must seek medical help for this condition or physical death will result, so it is with our sinful condition. We must seek help, or spiritual death will result. We have no choice.

In Romans 6 verse 23 we read,

"For the wages of sin is death, but the gift of God is eternal life."

In Romans 5 verse 8 we read,

"But God commendeth his love toward us, in that while we were yet sinners, Christ died for us."

We also read in I Corinthians 15 verses 3 and 4,

"For I delivered unto you first of all, that which I also received, how that Christ died for our sins according to the Scriptures, and that he was buried and that he arose again on the third day according to the Scriptures."

God sent his Son, Jesus Christ, to die on the cross and shed his blood to remove all our sins.

In Romans 5 verse 9 we read,

"Much more then, being justified by his blood, we shall be saved from wrath through him."

The blood of Jesus Christ cleansed us from all sin. The sin that you and I were born with, and the sins we knowingly or unknowingly have committed, were all paid for. Christ did all this for you.

Now the next step is yours. You must receive Jesus Christ personally by inviting him into your life.

In Romans, Chapter 10, verses 9 through 13 we read,

"That if thou shalt confess with thy mouth the Lord Jesus, and shalt believe in thine heart that God hath raised him from the dead, thou shalt be saved. For with the heart man believeth unto righteousness: and with the mouth confession is made unto salvation. For the Scripture saith, whosoever believeth on him shall not be ashamed. For there is no difference between the Jew and the Greek: for the same Lord over all is rich unto all that call upon him. For whosoever shall call upon the name of the Lord shall be saved."

Notice the word "whosoever." This means everyone, it excludes no one. It includes you. If you will call upon the name of the Lord, you shall be saved. Not maybe, or I hope so, or I think so, but shall be saved. When you invite Christ into your life, you, too, can have the positive assurance that you are saved. If you have never called upon the name of the Lord to be saved, why not do it now?

The Bible tells us in 2 Corinthians 6, verse 2,

"Behold now is the accepted time, behold now is the day of salvation."

Word daily—God will talk to you. Seek Christian fellowship. Memorize portions of the Bible.

If you have made this decision or feel that additional free literature would be helpful, please contact the address below.
